
cut of $G_q(z)$: $[-3, 3]$

cuts of $G_{q \pm Q}(z \pm w)$: $[-3, 3] \mp w$

C, here the dumbbell $C_{0.2}$

C_μ: dumbbell of χ, $\mu = 0.4$

a point w on C_μ

poles of f: $\pm i$, $\pm 3i$, ...

bosonic frequencies $\pm 2i$, $\pm 4i$, ...

C_R: circle of radius R
