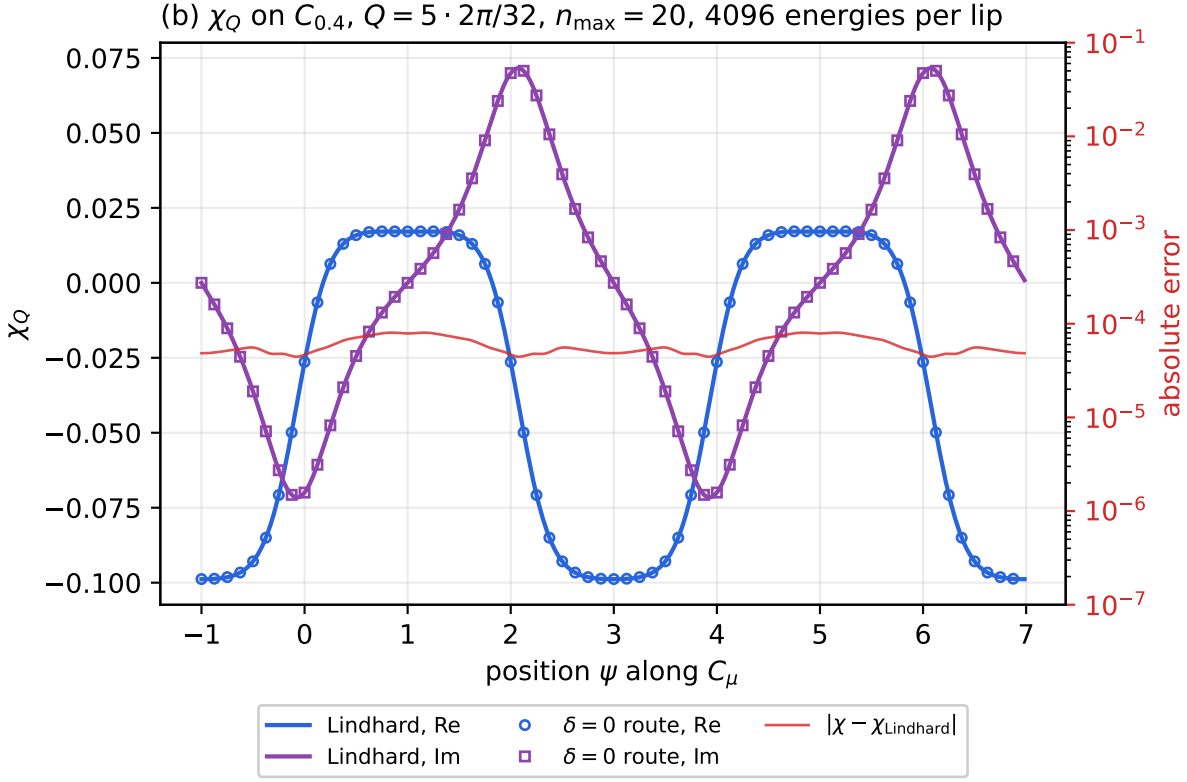
(a) error against the Lindhard function, $\mu = 0.4$
512 energies per lip
1024 energies per lip
2048 energies per lip
4096 energies per lip
max error on C_μ / max $|\chi|$
window: largest Fourier mode $n_{\max}$ of G kept at $\delta = 0$



(b) χ_Q on $C_{0.4}$, $Q = 5 \cdot 2\pi/32$, $n_{\max} = 20$, 4096 energies per lip
χ_Q
position ψ along C_μ
absolute error
Lindhard, Re
Lindhard, Im
$\delta = 0$ route, Re
$\delta = 0$ route, Im
$|\chi - \chi_{\text{Lindhard}}|$
